The Donna M. Crandall Foundation was created as a formal tribute to Donna Crandall, who battled Cystic Fibrosis for forty-one years.

The foundation strives to provide programs and services for Cystic Fibrosis families receiving care at Albany Medical Center.

Cystic Fibrosis is a genetic disease affecting both children and adults. There is no cure as of yet, but strides have been made.

There is no administrative cost associated with the foundation; it is the dedicated family members and supporters donating their time and efforts that keep the foundation growing.
